- 7. Click on Submit
- 8. Important: The Sentinel LDK communicates via TCP and UDP on port 80 and/or 1947. The socket 1947 is IANA-registered exclusively for this purpose. It is required that you open either port 80 and/or 1947 in your network settings. It is therefore required that your network and the firewall settings do not block port 80 and/or 1947. Set port 80 and/or 1947 to open in your router's settings.
- 9. Your cloud license will be activated within few seconds. Afterwards you should have access to QUADOA<sup>®</sup> Optical CAD. An internet connection is required at all times.

**Multiple Machines:** You can activate the same license key on multiple personal devices, such as your office workstation and home computer. Just follow the steps in this guide for each device. However, keep in mind that the license can only be used on one computer at a time.

**Privacy Data Information:** All personal data is stored on your personal computer. Only the QUADOA<sup>®</sup> license key is stored on the cloud server.
