

Network License Activation

1. Install the [Sentinel HASP/LDK Runtime Installer](#) on the **client-computer** where Quadoa is installed.
2. Install the [Sentinel HASP/LDK Runtime Installer](#) on the **server** that contains the Quadoa license.
3. On the **client-computer** open the **Sentinel Admin Control Center** by typing in the browser <http://localhost:1947/>
4. Browse to **“Configuration”** and switch to the **“Access to Remote License Managers”** tab.
 - a) Activate the **“Allow Access to Remote License”** checkbox
 - b) Activate the **“Broadcast Search for Remote Licenses”** checkbox
 - c) In the **“Remote License Search Parameters”** field, insert the IP address of the server which contains the Quadoa license

5. If you entered the correct parameters, you are able to run Quadoa on the client-computer via the network.
